

Year 2 News

This week we have been writing the Christmas story now that we know it so well from the play. The children have worked hard to include interesting adjectives and have been thinking about how the characters would feel upon hearing the exciting news.

In maths we have been learning about symmetry of 2D shapes and the properties of 3D shapes.

Christmas cards

As well as delivering the Christmas cards, we have also been making our own. We can't wait for you to see the finished result!

Pom pom panic!

We have been busy making pom poms and are now ready to cut them off and tie them together. We would be really grateful for any help with this. If it's easier, you could take some home to do in front of the television! Thank you so much.

Doubles and halves

Can you learn all of the double and half facts up to 20? e.g. Double 9 is 18 and half of 20 is 10.

If you master the numbers to 20, see what other doubles you can learn? Double 50 and half of 100 are useful things to know! Maybe you could think of some Christmas maths problems.

E.g. If there are 20 presents and your brother/sister get half of the amount of presents, how many would they get?

Merry Christmas!

Thank you all for another wonderful term! We hope everyone has a merry Christmas and feels rested for when we return on 3rd January 2019.
