

Science Week

The children have taken part very well in all the different hands on science activities this week and they have learned so much. We noticed how our Year 2 children helped the younger children so enthusiastically.

Homefun

From this half term we will be sending comprehension, spellings or maths activities each week to help consolidate the children's learning. Thank you for all your fantastic work at home. The children really love to show us their super learning.

Things to Remember

Parents Evenings— are on 28th February and 1st March. We have sent home the appointment times for you and we look forward to talking with you about your child.
